

IndustryUptime, Inc.

Process Plant Equipment Reliability

Because Uptime Is Everything

IndustryUptime Offers the Following Products for Maintenance and Reliability

Centrifugal Pump Stationary Wear Parts

DuPont™ Vespel® CR-6100 improves pump reliability and efficiency by allowing users to run closer wear ring clearances with greatly reduced chances for pump seizure during run dry events. By allowing closer clearances, the pump's rotor is stabilized reducing vibration and increasing mechanical seal life.

Synthetic Oils and Greases

Royal Purple® produces an extensive line of industrial lubricants for nearly all applications. These state-of-the-art lubricants are formulated to deliver superior lubrication performance, resulting in lower operating temperatures, improved equipment reliability, and increased efficiency. Once the lubricant housing is fully protected, it only makes sense to use superior lubrication products. More information about Royal Purple®, their products, and case histories are available at www.royalpurple.com

Thordon Bearings

Thordon Bearings designs and manufactures the most complete line of oil and grease-free water and product-lubricated vertical pump bearings in the industry. High reliability and cost-effective with excellent wear life and low operating friction, Thordon has been servicing the industry for over 30 years.

Laser Alignment

IndustryUptime is the manufacturer's representative for Easy-Laser® alignment systems in Northern California. Easy-Laser® alignment systems have been developed with over 20 years of experience in solving measurement and laser alignment problems for industry. This experience has resulted in the Easy-Laser® alignment system, which is easy to learn, easy to use, and easy to own. Call us to find out how robust, intuitive, and affordable a laser alignment system can be. (www.damalini.com)

Mechanical Seals and Support Systems

AESSEAL® manufactures a full range of cartridge mechanical seals, mixer seals, component seals, API mechanical seals, and engineered seals for nearly all fluid handling applications. AESSEAL® also manufactures the revolutionary **MagTecta™** bearing isolator. This double face seal can be applied to bearing housings, gearboxes, and other lubrication pumps in nearly all types of fluid handling equipment. AESSEAL® delivers exceptionally high quality and service combined with extraordinarily competitive prices. Information on the full product range, brochures, and company history are available at www.aesseal.com

Lubrication Support Products

Trico Manufacturing makes a complete line of lubrication and fluid protection equipment. Used in conjunction with MagTecta™ seals, Trico's closed-system oilers and Watchdog® desiccant breathers help process plants maintain lubricant cleanliness and quality. Trico also provides the Oil Safe® lubricant handling equipment and many other industry leading products.

Chemicals for Concrete Construction

IndustryUptime is proud to offer a full line of Unitex® products. From epoxy to cures and seals, Unitex® has an excellent selection of products for a diverse range of applications. Unitex® epoxy products are an excellent choice to cover a wide variety of your needs, including equipment grout needs, equipment foundation crack repair, chemical attack protection, and deep pore equipment grout up to 50 inches deep. With an outstanding selection of epoxies, you will surely find the correct one for the job.

Because Uptime Is Everything

IndustryUptime, Inc.

Process Plant Equipment Reliability

IndustryUptime Offers the Following Products for Maintenance and Reliability

Prognost

PROGNOST Systems GmbH is the No.1 partner for companies who want to ensure safe, reliable, and economic operation of their reciprocating piston compressors. PROGNOST Systems offer the only system in the industry that records and analyzes status data in real time and compares them using "pattern recognition" based on actual experience. It provides machine operators with a timely analysis of the causes in the form of plain text information. This means that any reciprocating piston machine monitored by this system can be shut down fast and reliably with virtually no risk of false trips.

Sulzer

Sulzer Pumps is one of the world's leading pump manufacturers. Sulzer focuses on specialized centrifugal pumps and agitators/mixers for the Oil & Gas, Hydrocarbon Processing, Pulp & Paper, Power Generation, Water & Wastewater and Food, Metals & Fertilizer markets. Sulzer's products are internationally reputed for their technical excellence.

Canned Motor Pumps

The world leader in canned motor pumps. Sealless and Leakproof Canned Motor Pumps, as designed and manufactured by the global Teikoku Group provide customers looking for high levels of mechanical reliability and fluid containment, the ultimate in centrifugal pumps for the transfer of hazardous, expensive and environmentally sensitive fluids. Teikoku and Chempump products are loaded with features that help customers reduce installation, maintenance, and space-related costs. (www.chempump.com)

Lubricant Containment System

IndustryUptime distributes OIL SAFE lubricant transfer containers in a wide range of colors and sizes. OIL SAFE lubricant transfer containers are innovative, practical, and durable, and have become the global standard of choice for industry. Color coded and fully sealing, OIL SAFE lubricant transfer containers ensure the accurate delivery of clean lubricant from bulk storage to point of use every time.

CPC Pumps International

CPC Pumps International has 50 plus years of experience in providing unique pump designs and production capabilities to the petroleum industry. CPC Pumps International offers customers engineered solutions for demanding applications and provides an extensive product range and unparalleled hydraulic performance coverage. With their focus on serving the market for centrifugal pumps designed and built to the newest American Petroleum Institute Standards, CPC Pumps is at the forefront of technological advancements. Your plant reliability and profitability can be greatly increased with their innovative products and features.

Flow Rate Controllers

For over 50 years, W.A Kates Company has been manufacturing flow rate controllers for nearly every type of application under the sun. From air to zinc hydrosulfate, Kates controllers provide a simple alternative for numerous complex flow applications. In addition, maintenance is almost nonexistent with this self-contained mechanical device. When you consider the big picture it is easy to see why Kates Flow Rate Controllers truly exhibit "The Genius of Simplicity." www.wakates.com
